

Two-factor authentication

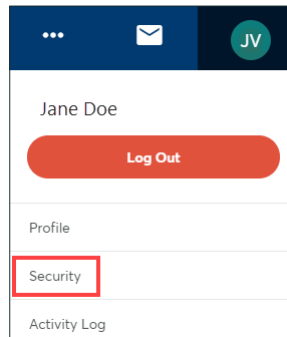

For extra account security, you can add a second layer of verification to your Online Banking account.

1. Download the **Google Authenticator Application** on your phone. Do **NOT** set up yet.

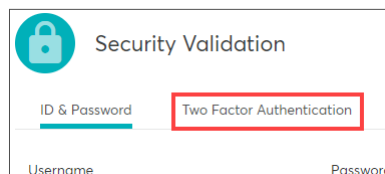

2. Log in to Online Banking.

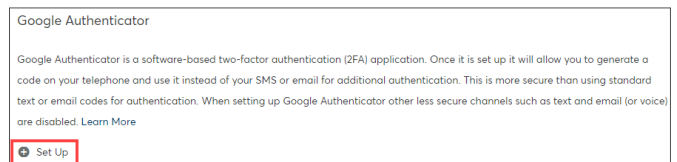

3. Go to your Profile Icon and click **Security**.

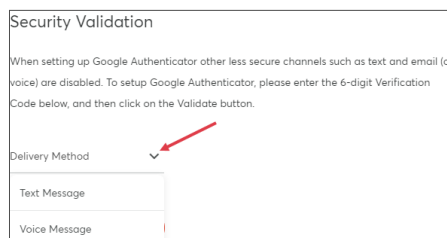

4. Select the **Two Factor Authentication** tab.

5. Click on **Set Up** under the Google Authenticator section.

6. Use the **Delivery Method** drop-down to choose your preferred code delivery method.

Two-factor authentication (cont.)

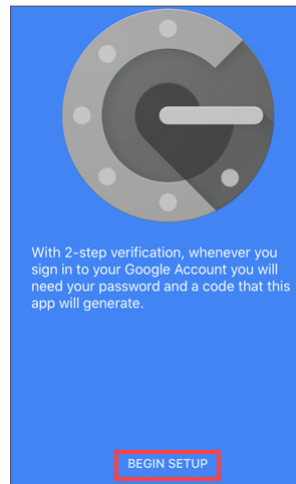

7. Click **Request Code**.

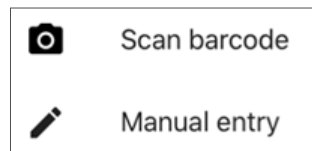

8. A code will be sent to your preferred delivery method; enter the code into **Verification Code**.

9. Open your Google Authenticator App and click **BEGIN SETUP**.

10. Choose either **Scan barcode** or **Manual entry**, depending on your preference.
If you select **Scan barcode**, you may need to allow camera permissions for the app.

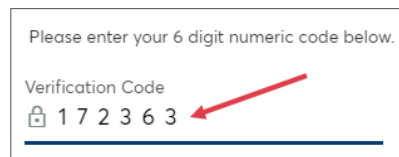

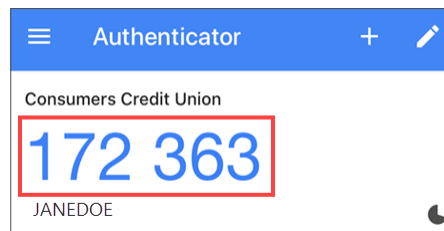

Two-factor authentication (cont.)

11. When prompted, scan the **QR barcode** or enter in the **Code** showing in your Online Banking.

12. After scanning the QR code or completing the manual entry, Google Authenticator will provide a 6-digit code. Enter this code into Online Banking under **Verification Code**. The code is on a timer and will update every 15 seconds.

13. Click **Submit**.

14. Click **Save**.
